

# Double your soyabean yield: Get more income

- Plant recommended varieties, using certified seed or farm-saved seed
- Inoculate the seed before planting
- Plant at the beginning of the rainy season
- Space rows or ridges at 50-60 cm apart, and planting stations 20-30 cm apart, within rows
- Plant 4-6 seeds per station
- Soon after germination, make holes between soyabean stations, place basal fertilizer that has phosphorous and potassium, and cover
- Control weeds, pests and diseases

Issued by the Clinton Development Initiative, Malawi - June 2013
