In just three years the Africa Soil Health Consortium (ASHC) has had tangible impact on the creation of communication materials on integrated soil fertility management in the continent, collaborating with diverse partners on five cropping systems.

- 130 communication materials developed for smallholder farmers in Africa by end of ASHC phase 1
- 267 scientists and extension staff trained in the production of farmer-friendly ISFM materials
- 1,548 unique pageviews to ASHC website in 2014
- 2,800 ISFM handbooks distributed
- 517,000 comics circulated in Kenya and Tanzania to get ISFM messages to young people
- 274 participants at ISFM handbook launch
- 7 languages used in printed materials
- 43 partners in Africa
- 1,548 contacts in ASHC database
- 14,647 unique pageviews to ASHC website in 2014
- 5 cropping guides under development
- 80% average participant satisfaction rate at write-shops
- 517,000 comics circulated in Kenya and Tanzania to get ISFM messages to young people
- 71 write-shop days
- $10.7m confirmed funds from B&MGF and AGRA
- 15 technical advisory group members on ASHC phase 1
