

## 1. ITYOKAA I LOON SOYBEAN

## 2. USORON NYA

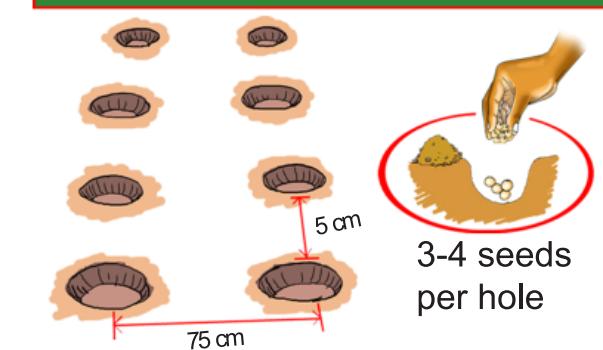

## 3. U SANGGEN I SHIAMAKAA

- a. Na jighjgh wer ishiamakaa la I de kuman iwer pue karihar chi ve u loo ga sha chia umenden tsebelee yo.  
b. Man er toma sam udidoo, tseghe.  
c. Er tom a shiamakaa la ikuma ayange pue chiiver u loo ye. Loo asange derimon I kuma ayangeataan, or mba ve mende la. Man alu amende akunduanyiin due shin amende akunduatargber u yemen ken akunduanyiin due yo, loogbin sha chiu ukera kimbir ga yo. Man yam shiamakaa gbin alu I due kuma akunduatargber gay o.  
d. Man er tom sha er I tesuu la voru.

## 4. U LOON SOYABEAN

- a. Loon soyabean amange ater shin amyin shin hongwa mom man na iaver I loon I kuma mitar utaan (5cm) sha agbur man laver I agbur ugen ver u gen yo, I kuma , mitar akunduatargber kaautaan (75cm) .  
b. Man loo soyabean sha pepe shin aiikeye sha u yangen mtser u yange sha chigh ki inungwasha mi la

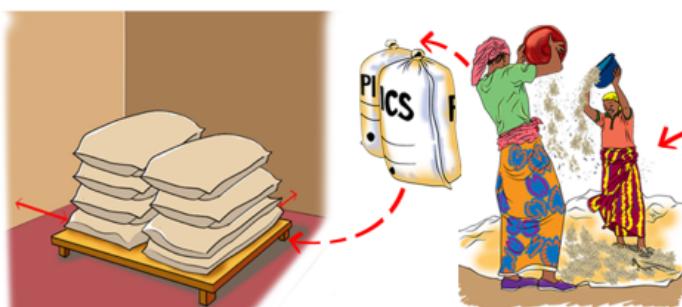

## 5. FERTILIZER APPLICATION

Location	Location	Characteristics
Southern Guinea	TGX 1448-2E TGX 1904-6F	Late maturing (100-120 days), non-shattering, good seed quality
Northern Guinea	TGX 1904-6F TGX 1951-3F TGX 1951-3F	Medium maturing (100-110 days), fodder yield low-shattering, good seed quality
Derived Savanna	TGX 1904-6F TGX 1951-3F TGX 1955-4F TGX 1448-2E	Medium maturing (100-120 days), fodder yield low-shattering, good seed quality
Sudan	TGX 1835-10E TGX 1987-10F TGX 1987-62F	Extra-early maturing (80-90 days), low-shattering, good seed quality, highly resistant to rust and bacterial

Fertilizer type	Rate (kg/ha)	Row spacing: 50cm In farrow, apply 1	Row spacing: 75cm In farrow, apply 1
SSP	125	Teaspoon Every 40cm	Soda bottle-cap Every 30cm
TSP,DAP	100	Every 100cm	Every 60cm

## 8. U GBIDEN SOYABEAN MAN U KORSHUN

## 7. U SUDAN TOM

## 6. ISHIMA I VEREN SHA TOM

- a. Alu amange a soyabean nga kuma er akunduanyiin nyiam yo, fa wer akuma u sudan, man too shom tondo atine a vesen la shin nyan sha er amise la aa ser mdoo u nyaa yo.  
b. Tsen atine a soyabean sha pee shin ijir ikongou I kuma lahadi uhar.
